Welcome ASTCT - NMDP Access Workshop Attendees!

Thursday August 24th – Friday August 25th, 2023
ASTCT Washington D.C. Headquarters
ASTCT NMDP ACCESS Initiative
Second Annual Workshop
Washington D.C.
August 24 & 25, 2023

Equal Outcomes for All
ACCESS Initiative: Purpose and Vision

• **PURPOSE:**
  – To reduce barriers to hematopoietic cell therapy and transplantation through implementation of changes in practice and policy by active, sustained engagement of the cell therapy ecosystem

• **VISION:**
  – To advance, measure and sustain progress toward universal access in the initial focus areas of awareness, poverty and racial inequality
ACCESS Initiative: Focus Area Committee Goals

**Awareness**
- To improve access to HCT/CT by identifying areas for increasing awareness education and intervention for the patient, physician, and transplant program

**Poverty**
- To identify patients at high risk of adverse outcomes due to socioeconomic adversity and develop patient-, center-, and policy-related initiatives to improve their access and survival

**Racial Inequity**
- To improve equity in access and outcomes for all HCT/CT recipients regardless of their race or ethnicity
ACCESS Initiative: Committee Leadership

**Awareness**
- ASTCT Chairs
  - Brenda Sandmaier
- NMDP Chairs
  - Erica Jensen

**Poverty**
- ASTCT Chairs
  - Navneet Majhail
- NMDP Chairs
  - Jessica Knutson

**Racial Inequity**
- ASTCT Chairs
  - Eneida Nemecek
- NMDP Chairs
  - Rafeek Yusuf

Equal Outcomes for All
Inaugural ASTCT-NMDP ACCESS Workshop
July 28 & 29, 2022 Washington, D.C.

Intersectionality of Cancer, Aging and Disparities: A Biological Basis

ACCESS INITIATIVE WORKSHOP

Saturday, February 18, 2023
12:30 PM - 2:30 PM EST
World Center Marriott - Crystal NPG

THE ACCESS INITIATIVE NEEDS YOUR HELP.

Join the American Society for Transplantation and Cellular Therapy (ASTCT™) and the National Marrow Donor Program (NMDP®) in the fight to increase ACCESS to transplant.

Equal Outcomes for All
The ASTCT-NMDP ACCESS Initiative: A Collaboration to Address and Sustain Equal Outcomes for All across the Hematopoietic Cell Transplantation and Cellular Therapy Ecosystem

Jeffery J. Auletta¹,²,*, Brenda M. Sandmaier³,⁴, Erica Jensen¹, Navneet S. Majhail⁵, Jessica Knutson¹, Eneida Nemecek⁶, Femina Ajayi-Hackworth¹, Stella M. Davies⁷, on behalf of the ACCESS Workshop Team¹

¹ National Marrow Donor Program, Minneapolis, Minnesota
² Hematology/Oncology/Blood and Marrow Transplant and Infectious Diseases, Nationwide Children’s Hospital, Columbus, Ohio
³ Fred Hutchinson Cancer Center, Seattle, Washington
⁴ University of Washington School of Medicine, Seattle, Washington
⁵ Sarah Cannon Transplant and Cellular Therapy Network, Nashville, Tennessee
⁶ Oregon Health Sciences University, Portland, Oregon
⁷ Bone Marrow Transplant and Immune Deficiency, Cincinnati Children’s Hospital Medical Center, Cincinnati, Ohio

Transplant Cell Ther 2022 28(12):802
Agenda: Day 1

• Committees should assign a notetaker for committee breakouts and for each committee group presentation
• Notetakers will submit electronic notes to Debbie Fernandez dfernandez@francefoundation.com

Thursday, August 24, 2023

1:30 PM – 2:00 PM
Arrival/Refreshments/Welcome
1:45-2:00 Overview: Jeff Auletta, Stella Davies

2:00 PM – 3:30 PM
Committee Breakouts
Committees meet individually to review progress/ideas

3:30 PM - 4:00 PM
Break/The France Foundation Presentation
10-minute break; 20 minutes The France Foundation Capabilities Presentation

4:00 PM – 6:00 PM
Committee Presentations
1. 4:00-4:40 pm Poverty Committee
2. 4:40 -5:20 pm Racial Inequity
3. 5:20-6:00 pm Awareness

6:00 PM - 6:30PM
Wrap-up Day 1

7:00 PM
Dinner
Chef Geoff’s
2201 M Street NW (202) 237-7800

7:45 PM – 8:30 PM
Dinner Speaker
Why Achieving Health Equity Takes Trust and Courage
Ray Bignall, MD, FAAP, FASN
Chief Diversity and Health Equity Officer
Nationwide Children’s Hospital
Director, Kidney Health Advocacy and Community Engagement (KHACE)
Division of Nephrology and Hypertension
Associate Professor of Clinical Pediatrics
The Ohio State University College of Medicine
Agenda: Day 2

- Each committee should assign a notetaker for each project deep dive
- Notetakers will submit electronic notes to Debbie Fernandez dfernandez@francefoundation.com
Considerations

• What is going well?
• What adjustments are needed?
  o Committee structure
  o Goals
  o Pilot projects
• What do we need?
• Do we have the right people?
• How can we integrate patients into the Initiative?
• Industry partnerships

Helping one person might not change the world, but it could change the world for one person. – Anonymous

“I have a dream that one day this nation will rise up and live out the true meaning of its creed.”
-- August 28, 1963
on the steps of the Lincoln Memorial

ASTCT-NMDP ACCESS Initiative
Awareness Committee
Washington D.C.
August 24 & 25, 2023
2022 ACCESS Working Group Committee: Awareness

• ASTCT Chair: Brenda Sandmaier
• NMDP Chair: Erica Jensen

Vice Chair: Jennifer Holter Chakraborty
Challenge

A key barrier to increasing ACCESS to therapy is lack of awareness

Providers

• Lack of knowledge of rapid advancements and changes in treatment options
• New standards of care, including referral guidelines that often are not disseminated to community physicians or even physicians at academic institutions that do not offer HCT/CT

Patients

• Lack of knowledge of HCT / CT treatment options
• Access to available care and support information
Physician Education and Access to Research

Subcommittee Chair: Jennifer Holter Chakrabarty
Subcommittee Members:
• Taha Aljuhaishi
• Pashna Munshi
• Tania Jain
• Sam Watters
Physician Education and Access to Research

Goal: Update information physicians reference for the latest information

Accomplishments

✓ Identified target areas for improvement in physicians reference in HSCT
  ✓ Target areas identified include Determining Eligibility for HSCT highlighting early HLA testing, improvement in expansion/safety in older adults, expansion access in ethnically diverse patients
  ✓ Highlight improvement in quality of life and outcomes in mismatched and matched donors
✓ Incorporation of HCT Consultation Timing Guidelines in UpToDate topics including AML, MDS, ALL
✓ Incorporating Donor and Cord Blood Unit Selection Guidelines in Donor Selection
✓ Incorporating new GVHD/Outcome date in Early Complications of HCT
✓ Updates in Overview of AML, ALL in children and Adolescents, and treatment of high or very high risk MDS to incorporate early referral for Allo evaluation
Physician Education and Access to Research

Goal: Update information physicians reference for the latest information

Coming Up

• Early discussion with ASTCT Education and Content Committees for Highlight of ACCESS initiatives
• Identification of Diversity and Equity Highlights with Content Committee for “ASTCT News Daily”
• Nucleus Spotlight on Access/Equity
• Identification of Dr. Munshi and Dr. Al-Juhaishi to lead updates in Auto and Car-T for UpToDate with ASTCT lead
• Work with MMRF and other foundations/patient groups for expansion of educational scope.
Community Physician Awareness

Subcommittee Chair: Anna Cincotta (Interim Chair, Emily LaMonica)
Subcommittee Members:
- Dr. Beth Stenger (CHOA)
- Dr. Staci Arnold (CHOA)
- Dr. Tania Jain (Johns Hopkins)
- Dr. Alexandra Gomez Arteaga (Weill Cornell)
- Dr. Heather Stefanski (NMDP)
- Dr. Steven Devine (NMDP)
- Ruth Phillips (Blue Spark Technologies)
- Karen DeMaio (LLS)
- Emily LaMonica (NMDP)
- Sam Watters (NMDP)
- Becca Groebner (NMDP)
Community Physician Awareness

Goal: Develop partnerships and connections with community physicians

Objectives:
- Target high unmet need areas and engage community providers that do not have well established relationships with their regional transplant and cell therapy network
- Create peer-to-peer networking space around disease theme
- Spark collaborative discussion around shared challenges
- Highlight latest research and high priority clinical trials

Thank you to Ruth Phillips (Blue Spark Technologies), Dr. Stenger & Dr. Arnold (CHOA), Dr. Jain (Johns Hopkins), Dr. Gomez Arteaga (Weill Cornell), Karen DeMairo (LLS), moderators Dr. Stefanski and Dr. Devine and our NMDP Local Provider Partnership team who facilitate these regionally.
Community Physician Awareness

Goal: Develop partnerships and connections with community physicians

Accomplishments
✓ NJ/NYC Peds SCD Physician Exchange Aug 17
  - Hackensack - NYP Columbia - Cohen Children’s Medical Center of NY
  - NYU Winthrop - St Joseph’s Health - NYP Brooklyn Methodist

✓ GA Peds SCD Physician Exchange Aug 22
  - CHOA - MUSC
  - Navicent Health - Medical College of GA - Memorial Health/Children’s Hospital of Savannah

Coming Up
• Adult MDS Physician Exchanges (coming Fall 2023)
Partnerships to Increase Patient Awareness

Subcommittee Chair: Becca Miller
Subcommittee Members:
- Mary Hengen, NMDP
- Katie Schoeppner, NMDP
- Anna Cincotta, NMDP
- Bri Springer, NMDP
- Karen DeMario, LLS
Partnerships to Increase Patient Awareness

Goal: Build / strengthen partnerships with national disease specific groups and health focused community organizations

Accomplishments
✓ Collaborating with American Cancer Society on opportunities to increase awareness of resources through their relationships with community physicians and patient support resources
✓ Partnering with LLS to increase access to transplant in the Hispanic Community
✓ Working with STAR (Sickle Cell Transplant Advocacy and Research Alliance)
✓ Sickle disease roundtables in NE and SE
✓ Met with Deloitte on how to help educate CGT leaders on patient access issues
Partnerships to Increase Patient Awareness

Goal: Build / strengthen partnerships with national disease specific groups and health focused community organizations

Coming Up

- **LLS Collaboration Opportunities**
  - LLS/NMDP Regional Hispanic Community Engagement: Local Clinical Ops Partner in Chicago to join LLS on a video for patient education along with a TC physician and a patient. It will focus on engaging the Hispanic community of joining the registry and share information about the support for donors and the services for patients from diagnosis to survivorship.
  - In person panel for sponsored by LLS at Malcolm X College. Include live Q&A, donor recruiting, and patient services awareness.
  - Both programs will be in Spanish with the intent to target multigenerational households. Opportunities to do this outreach in other regions.

- **Engaging with CGT leaders on Patient Access to new therapies**
  - Patient Services and Health Equity Leaders participating in a panel to represent access barriers for CGT patients at Deloitte's NextGen Therapies Industry Working Group in September 2023.

- **Discovery on additional partnership opportunities**
  - International Myeloma Research Foundation including the M-POWERed Initiative to improve outcomes in African American patients
  - Myeloma Crowd (HealthTree Foundation)
  - Epic (social determinants of health data) and other technology companies that could support patients
  - Expand collaboration opportunities with LLS, ACS and other organizations on driving patient awareness and education

Equal Outcomes for All
Awareness Future Exploration

- Focus on: Myeloma, AML and MDS
- Investigate Patient advocacy communication / resource opportunities with industry partnerships (Google, WebMD, top search returns)
- Add fellows as key audience to educate
- Assess ASCO opportunity
- Advocate for telemedicine outreach and other key community barriers
- Explore education / coordination with IHS (possible intersection with other committees)
- Creation and dissemination of standardized diagrams of treatment roadmaps
- Realign goals around key opportunities with CPE / Fellow education and connection and patient awareness
ASTCT-NMDP ACCESS Initiative
Poverty Committee Update

Washington D.C.
August 24 & 25, 2023

Equal Outcomes for All
ACTIONABLE PRIORITIES

• **Identify** HCT and cellular therapy recipients at high risk of adverse outcomes due to socioeconomic adversity and develop patient-, center-, and policy-related initiatives to improve their access and survival.
FOCUS AREAS

• Reducing barriers to access through Medicaid
• Understanding access barriers using Kaiser dataset
• Developing TCT advocacy swat *posse*
Assessing Medicaid coverage for hematopoietic cell transplantation and chimeric antigen receptor T-cell therapy: A project from the ASTCT-NMDP ACCESS Initiative

Jeffery J. Auletta 1,2, Nandita Khera 3, Patrick DeMartino 4, Amar H. Kelkar 5, Rafeek A. Yusuf 1, Stella M. Davies 6, Jessica Knutson 1, Ellie Beaver 1, Alycia Maloney 7, Navneet S. Majhail 8
Medicaid Coverage for Cell Therapy Patients: Day 1

Ellie Beaver, Sr. Manager, Health Policy
Agenda

• Day 1
  – Overview of Medicaid scan results
  – Key takeaways

• Day 2
  – Policy intervention proposals
  – Top intervention targets
  – Engaging ACCESS members
  – Accelerating Kids Access to Care Act (AKACA)
Medicaid Policy Analysis
The ACCESS Workgroup, a collaboration between NMDP and ASTCT to address non-HLA barriers to transplant, commissioned a 50-state + DC scan of state Medicaid programs for the following coverage policies.

- Coverages policies for allogeneic and autologous stem cell transplant
- Coverage policies for FDA-approved CAR-T therapies
- Travel and lodging benefits
- Payment methodology for donor search and cell acquisition costs

Manatt Health was contracted to execute the scan.

The scan was completed in May of 2023.

Results were presented to ACCESS Workgroup members over the summer of 2023.
The ACCESS Workgroup, a collaboration between NMDP and ASTCT to address non-HLA barriers to transplant, commissioned a 50-state + DC scan of state Medicaid programs for the following coverage policies:

- Manatt Health was contracted to execute the scan, completed in May 2023.
- Results were presented to ACCESS Workgroup members over the summer of 2023.
Clinical Coverage Policies

Travel and Lodging Coverage

- Travel expenses, lodging expenses, meal expenses and companion expenses.
- Limits on such coverage (such as dollar caps) and whether enrollees must pay for the services out-of-pocket and seek reimbursement.
- Additional payment for donor costs for allogeneic stem cell transplants.
- Methodologies for determining the amount of such additional payments.

Manatt analyzed key state Medicaid fee-for-service (FFS) coverage and reimbursement issues related to stem cell transplants and CAR T-cell therapies

Research Scope

- Coverage of stem cell transplants for the following indications:
  - Allogeneic and Autologous
    - Acute Leukemia (AML, ALL)
    - Lymphoma
    - Multiple Myeloma
  - Allogeneic
    - Sickle Cell Disease
    - Myelodysplastic Syndrome (MDS)
- How coverage compares to the FDA label for certain CAR Ts used to treat multiple myeloma, pediatric ALL and lymphoma.
  - Travel expenses, lodging expenses, meal expenses and companion expenses.
  - Limits on such coverage (such as dollar caps) and whether enrollees must pay for the services out-of-pocket and seek reimbursement.

Note: Manatt’s analysis focused on state policies, not those developed by or applied to Medicaid managed care organizations. CAR Ts examined consisted of Yescarta for lymphoma, Carvykti for multiple myeloma, and Kymriah for pediatric acute leukemia.
Scan Findings: Coverage for alloHSCT

What should the standard be?

No states met current clinical standards for alloHSCT.

13 states had more specific coverage policies but were out of alignment with current clinical guidelines.

34 states had unclear coverage rules, vague language, non-specific indications.

4 states state coverage for all 5 indications, but lack details about the conditions for coverage.
Of the states that had fully developed coverage policies, **all** had at least one unreasonable coverage condition.

Additional state-level detail is available in Manatt’s research documents.
Most state CAR T coverage policies* were reasonable, more so than the stem cell transplant policies. Many states cover CAR T therapies in accordance with the FDA label. Some states have unreasonable restrictions not based on the FDA label, such as prohibition of coverage if patients previously received a CAR T or had undergone a stem cell transplant. Additionally, some states had discriminatory usage requirements, such as no coverage for those with HIV or hepatitis B or C.

*The data analysis was based on Yescarta for lymphoma, Carvykti for multiple myeloma, and Kymriah for pediatric acute leukemia.
Most state CAR T coverage policies were reasonable.

However, several states did have coverage restrictions that ASTCT clinicians identified as inappropriate.

In addition, many states prohibit coverage of CAR Ts if a patient had previously received another CAR T or had undergone a stem cell transplant, a restriction that is not in the FDA label.

Additional state-level detail is available in Manatt’s research documents.
Scan Findings: Medicaid Travel Benefits

All states cover transportation to Medicaid-covered services. The type of transportation offered varies by state and is dependent on cost-effectiveness and the Medicaid beneficiary’s needs.

- Every state covers out-of-state travel, though some have more stringent requirements that must be met.
  - In Alabama, Medicaid beneficiaries must have their provider justify the need for out-of-state services and provide evidence that such services cannot be obtained in the state.
  - Georgia only allows out-of-state travel for treatments that are not normally provided by in-state medical providers.
- Nearly all states say they cover airfare; others may also cover travel by commercial airplane but do not specify this in their policies.
- Most states provide mileage and gas reimbursement for travel by personal car when the Medicaid beneficiary, their attendant or another volunteer can drive to the appointment or treatment.
  - Iowa will cover car rental expenses when it is the most economical choice given the Medicaid beneficiary’s needs and the Medicaid beneficiary is able to drive themselves or has someone who is available to drive them.
Scan Findings: Medicaid Travel Benefits

All states cover transportation to Medicaid-covered services.
- Type of transportation offered varies by state and is dependent on cost-effectiveness and the Medicaid beneficiary’s needs.

Every state covers out-of-state travel.
- Some states have more stringent requirements that must be met.
- In Alabama, Medicaid beneficiaries must have their provider justify the need for out-of-state services and provide evidence that such services cannot be obtained in the state.
- Georgia only allows out-of-state travel for treatments that are not normally provided by in-state medical providers.

Nearly all states say they cover airfare.
- Some states may also cover travel by commercial airplane but do not specify this in their policies.

Most states provide mileage and gas reimbursement for travel by personal car when the Medicaid beneficiary, their attendant or another volunteer can drive to the appointment or treatment.
- Iowa will cover car rental expenses when it is the most economical choice given the Medicaid beneficiary’s needs and the Medicaid beneficiary is able to drive themselves or has someone who is available to drive them.
Nearly all states cover lodging expenses related to travel for Medicaid-covered services.

Lodging reimbursement is often limited to instances when lodging is more economical than additional round trip transportation to the medical facility or the beneficiary needs to be nearby the medical facility.

Additional state-level detail is available in Manatt’s research documents.
Nearly all states cover meal expenses related to travel to Medicaid-covered services.

Meal reimbursement is often limited to instances when the Medicaid beneficiary must travel a significant distance or be away from their residence overnight to receive treatment or attend an appointment.

Additional state-level detail is available in Manatt's research documents.
Other Findings for Travel, Lodging, Meals Benefits

</tr>
<tr>
<td>Percentage of Charges</td>
<td>Payment is a percentage of charges that the provider bills for stem cell acquisition.</td>
<td>AR, WA, WI, WY</td>
</tr>
<tr>
<td>Charge or Cost-Based Reimbursement, Subject to a Cap</td>
<td>Payment based on charges or costs, but reimbursement is subject to a cap.</td>
<td>IL, LA, MS, MO, NV, OR</td>
</tr>
<tr>
<td>Other Methodologies</td>
<td>Payment methodology other than based on costs or charges.</td>
<td>HI, IA, OH, VA</td>
</tr>
</tbody>
</table>
Conclusions and Next Steps

Conclusions
- Medicaid coverage for alloHSCT is vague or misaligned with current practice
- Car-T coverage policies are better, but could be improved
- Travel, lodging, meals benefits vary widely and are most likely not serving patients well
- Payment for donor costs spans the spectrum

For Tomorrow
- In-depth discussion about the next steps
- Think about your experience with your state Medicaid program
  - Specific examples of barriers
  - Practices or processes that cause delays in time to transplant

Scan summary slides will be shared with the ACCESS group this afternoon

**Stakeholders:** Transplant center representatives, NMDP Health Services Research & CIBMTR staff, representative from Poverty committee
Accomplishments in the last year

1. Expansion of the project to include NMDP Health Equity team
2. Initial assessment of transplant center needs & interest to engage in the project
3. Development of toolkit for centers
4. Plan to launch Health Equity in Practice pilot project with selected centers (Fall 2023)
ASTCT-NMDP ACCESS Initiative

Racial Inequity Committee
Initiative #2: Race/Ethnicity Data Optimization

Health Equity in Practice

Washington D.C.
August 24 & 25, 2023
Delilah Robb, MPH
Program Manager, Data and Implementation Science
Opportunity for Improvement

• Health outcomes and healthcare access barriers are inextricably connected.
• Barriers at the individual, structural and systematic levels have resulted in transplant access and outcomes disparities by race.
• Transplant centers (TCs) are interested and motivated to increase access to racially and ethnically diverse patients but do not always have access to data driven solutions.
Health Equity Survey

The survey goal is to better understand TC needs around health equity, create usable tools and resources to help improve practice leading to better patient outcomes and improved system performance.
What is your role at the transplant center? (select all that apply)

- Social Worker, 13, 32%
- Transplant Coordinator, 13, 32%
- Administrator/Program Manager, 7, 17%
- Other, 2, 5%
- Nurse, Transplant Coordinator, 3, 7%
- Physician, 3, 7%
What challenges or barriers does your transplant center have with implementing health equity improvement projects (select all that apply)?

- Resources: 14
- Staff shortages: 12
- Capacity: 10
- Knowledge of how and where to begin: 10
- Limited data: 3
- Other: 0
What tools and resources would be helpful to improve health equity efforts at your transplant center (select all that apply)?

- Community engagement tools: 25
- Clinical research health equity resources: 24
- Implicit bias training and cultural humility training (potentially specific to BMT): 21
- Planning and meeting tools: 18
- Quality improvement tools: 17
- Relationship building with community referring physicians: 17
- Other: 0
What type of data would be helpful to better understand and improve health equity at your transplant center? (Select all that apply)

- Unmet needs analysis and market maps: 29
- Racial and ethnic demographics for searches initiated with NMDP: 25
- Social vulnerability index of the communities your transplant center: 25
- Racial and ethnic demographic of the community population: 24
- Patient reported outcomes: 23
- Patient race and ethnic claims data: 13
Solution

Provide data focused on racial equity and best practices for collecting racial and ethnic data to better inform TCs direction on implementing solutions.

Address and reduce barriers to transplant by providing a TC-directed quality improvement toolkit empowering centers to identify and strengthen health equity programming and services they provide.
Aims

Increase TC access to data and resources to reduce capacity to drive health equity projects.

Increase TC knowledge of their patient demographics, community population and barriers to transplant.

Support TC in building relationships with community, community providers and NMDP.
Outcomes

• Increase the number of racially and ethnically diverse patients transplanted.

• Improve health outcomes for racially and ethnically diverse patients.

• Increase health equity metrics at the TC that are mandated by governing entities:
  • National Cancer Institute
  • Clinical Trials Enrollment
  • CMS

• TC complete one health equity improvement project in toolkit
Audience

TCs who are interested in health equity and ready and able to engage in systems change projects

- Physicians and advance practice providers
- Social workers
- Nurse coordinators
- Data managers
- Administrators
Toolkit Outline

- Introduction
- Assessment
- Data
- Community Engagement
- Quality Improvement
- Education and Training Resources
- Evaluation Tools
Assessment

Self-guided evaluation using internal (TC) and external (NMDP/Be The Match) data to identify:

- Health equity areas to strengthen/enhance
- Individual, structural and systematic barriers
- Resources needed to increase transplant access to racially and ethnically diverse populations
Data

- Preliminary search
- Formal search
- Transplants
- Market Analysis
- Age
- Gender
- Race/Ethnicity
- Disease
Market Analysis

Population and transplant data

- Analyze transplant need, met need and unmet need by patient demographics to identify disparities in accessing transplant

Community data

- Adding layers such as income, population diversity, social vulnerability index to help identify focus areas

Toolkit Utilization Example #1

Assessment Question

What racially and ethnically diverse population has the largest unmet need? (This information can be found in the data provided by NMDP)

To focus on access, go to Community Engagement on pg. X of the Health Equity in Practice Toolkit
Toolkit Utilization Example #1 Cont.

Toolkit Section: Community Engagement

• What programs or initiatives exist at your TC to reach racially and ethnically diverse patients and/or communities?
• What community outreach partnerships do you have?
• Does your TCs partner with community health workers? Cultural brokers? Interpreters?

Toolkit to include resources to improve/strengthen outreach to community providers and patients.

Toolkit will guide TCs in developing strategies to improve/strengthen reach to racially and ethnically diverse communities.

• How can you improve/strengthen your community outreach efforts?
• How can you improve/strengthen your community provider relationships?
Toolkit Utilization Example #2

Assessment Questions
What percentage of patients have their race and ethnicity documented in their chart? ___________

Are you interested in improving/strengthening race and ethnicity data collection processes at your TC?

a. Yes
b. No, not at this time

To focus on data collection, see the Quality Improvement Tools and Resources on pg. X of the Health Equity in Practice Toolkit
Toolkit Utilization Example #2 Cont.

Toolkit Section: Quality Improvement Tools and Resources

• When is race and ethnicity information collected from patients?
• Who collects race and ethnicity information from patients?
• When and who enters patient race and ethnicity into the electronic medical record?
• How is patient race and ethnicity entered into MatchSource?

Toolkit to provide best practice resources to improve/strengthen collection of patient race and ethnicity.

Toolkit will guide TCs in developing strategies to improve/strengthen racial and ethnic data collection processes.

• How can you improve the process of collecting race and ethnicity information from patients?
• What can you do to make patients feel more comfortable disclosing their race and ethnicity information?
Timeline

• Phase 1
  • Create toolkit
  • Deliver toolkit to five TCs starting November 6th
  • Evaluate toolkit

• Post-Phase 1
  • Modify toolkit, as needed, based on evaluation findings

• Phase 2
  • Deliver toolkit 2.0 to five additional TC by end of FY24

• Future Plans for Sustainability
  • Make HEP toolkit available to TC to establish interest
Scope

Kickoff Meeting

• Nov. 6-10, 2023

Toolkit

• Assessment
• Data
• Tools and resources

Check-in with TCs

• Provide support, as needed

Evaluation

• Pre-post pilot survey
Key Milestones

- **January – March**: Delilah Robb hired at NMDP/Be The Match
- **April – June**: Information gathering, Literature review
- **June – July**: Internal stake holder interviews, Literature review
- **August – September**: Toolkit Development, Implementation, Strategy development
- **October**: Toolkit finalized
- **November 6 - 10**: Begin HEP Pilot: Kickoff meeting with TCs

Equal Outcomes for All
Pilot TC Criteria

• NCI – Cancer Center (more accurate denominator data)
• Region
• Size
• Patient demographics
• Community demographics
• CIBMTR data quality
• Greatest need
We want to hear from you!

Complete this short health equity survey to share what data, tools, and resources would TCs reach their health equity goals and if you're interested in participating in the Health Equity in Practice Pilot.

Thank you!
Questions/Discussion?
Preview Day 2

• Call to Action
• Group Discussion Questions
Slides of initiatives #1 and #3 for reference
Initiative #1: Level the Knowledge

1. Review existing NMDP/ASTCT patient educational resources across transplant continuum for cultural sensitivity

2. Community Engagement Studios: Moderated sessions to obtain input from representatives from specific groups (Black, Latino, Asian, HPI, Indigenous) about transplant educational resources

3. Create a new index of modified patient educational resources, with date of review

**Stakeholders:** community representatives, transplant center members, NMDP Patient Services staff, representative from Awareness committee
Initiative #3: Workforce Development

1. Collaborate with ASTCT (URM SIG, DEI committee) to support their ongoing projects to create a pipeline program for underrepresented trainees,
   - Start with physician workforce
   - If successful, continue to build similar programs for APPs, nursing, pharmacy, social workers, etc.

Stakeholders: Transplant center representatives, NMDP & ASTCT staff, Representatives from ASTCT URM SIG & DEI committee
